## Opportunity is knocking again!

To: INFOLINK Public Library Director  
From: Cheryl O'Connor, Executive Director  
[coconnor@infolink.org](mailto:coconnor@infolink.org)  
Date: December 11, 2009

### Back in 2005

we sent you a memo starting with these words:  
Imagine: Your customers walk into the library and know that there is a convenient wireless Internet connection available for their use. Imagine if **all** residents in the INFOLINK region had the same experience at their public library. INFOLINK offers to help make this vision a reality. INFOLINK and the New Jersey State Library would like to see wireless networks for customer access in every public library AND we'd like our customers to know that we have them!

### Today, December 2009

Wireless Hot Spots have been rolled out across all four Regional Library Cooperatives and business is booming in your libraries. At this point in time, INFOLINK **on its own** -- extends the opportunity for your library to **upgrade your existing wireless network**. You want seamless and trouble free wireless access in your library so act now. Or if you do not yet offer wireless access for your users, INFOLINK will extend a subsidy to brand new participants as well. Again, we will be partnering with **Alisa Khaitan** of **Zenith Resources** as a preferred provider to provide and set up the equipment. We must thank the INFOLINK Executive Board for approving the subsidization of this project for our public libraries.

### Express your interest by December 31, 2009.

If you want to learn more about this opportunity, please complete the section below and fax it to INFOLINK by the end of the year. The ship is sailing so jump on board. Depending on the number of INFOLINK participants that commit, the subsidization level from INFOLINK will be 50% up to a potential of 100%. NOTE: Equipment and labor for a wireless upgrade are approximately 50% cost of the original installation however costs will vary according to individual building size and layout.

Check one of the following, provide the contact information, and fax back ASAP to the INFOLINK Office at 732-752-7785 or 800-793-8007.

- Yes, we are interested in upgrading our existing Wireless Network.
- No, we are not interested in (or do not need) an upgrade of our existing Wireless Network.
- We do not have a Wireless Network and are interested in getting a quote to implement one.
